PROJECTS

LEARNX – FULL-STACK SCHOOL MANAGEMENT SYSTEM

Technologies: PHP 7.4+, MySQL, HTML5, CSS3, JavaScript

- Built a role-based school management app featuring attendance, grading, and MCQ modules.
- Designed a secure, normalized database with 20+ tables and injection prevention.
- Implemented a responsive UI with role-based access control.

TRAVEL TROVE - TRAVEL AGENCY

Technologies: PHP, HTML5, CSS3, JavaScript, MySQL, Apache, Git

- Built a dynamic booking system featuring tour exploration, user sessions, and secure reservation routing.
- Designed a normalized MySQL relational database to manage itineraries, user profiles, and booking ledgers.
- Engineered a responsive frontend with client-side validation for seamless multi-device browsing.

FIX ON GO - ON ROAD VEHICLE BREAKDOWN ASSISTANT (ONGOING)

Technologies: Firestore, Firebase, Flutter, Dart, Git, Github

- Developed a mobile application to streamline real-time vehicle breakdown assistance.
- Implemented secure backend data management, user authentication, and real-time updates using Firebase.
- Designed a responsive mobile interface optimized for quick navigation and seamless user experience.
